## PROFESSIONAL SUMMARY

A web designer/developer with a strong affinity for design. Spent over 10 years in the film and television industry and have strong storytelling abilities and excel in making things as user friendly as possible. Experience with HTML, CSS, JavaScript, jQuery, Firebase, and Node.js. Strong ability to collaborate and problem solve served me well in the film industry and is also very relevant in web design and development.

## TECHNICAL SKILLS

**Languages/Tools:** HTML, CSS, JavaScript, jQuery, AJAX, JSON, Firebase, Node.js, Express.js, MySQL

**Design Software:** Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Adobe Premiere, Adobe After Effects.

## PROJECTS

### Project Title — *Rapid Logger*

July 2019

The Rapid Logger is designed to be a personal task management system that helps capture and organize tasks/events/thoughts quickly and easily. The brain often doesn't work in an orderly fashion so organizing a task manager that way doesn't always work. The rapid logger allows the user to quickly type in their events/tasks/notes using designated hotkeys and then they are automatically sorted in the task manager.

- Tools Used: HTML5, CSS3, Materialize, Javascript, jQuery, MySQL, Node.js, Express.js, Handlebars, Passport.js, Sequelize
- <https://rapid-logger.herokuapp.com/>

### Project Title — *Friend Finder*

June 2019

A friend finding app that takes user responses to a quick survey and stores them in a database. Their answers are then compared to the other users in the database and the person with the closest results to their answers are returned as their match.

- Tools Used: HTML5, CSS3, Bootstrap, JavaScript, jQuery, Node.js, and Express.js.
- <https://agile-mesa-30631.herokuapp.com/>

### Project Title — *Burger Logger*

June 2019

A burger logger app where the user can add burgers to the menu with an HTML form. When a burger is added to the "Ready to Eat" menu, it is also added to the MySQL database. When a burger is devoured, the burger moves to the right side of the screen under the "Already Eaten" field. The database is also updated with the new status of that eaten burger.

- Tools Used: HTML5, CSS3, Bootstrap, jQuery, Node.js, Express, MySQL, Handlebars, and ORMs
- <https://dry-waters-65638.herokuapp.com/>

### Project Title — *TRVL*

May 2019

A one-stop-shop travel website where users can search a variety of destinations with high quality photos, weather information, and a map with information specific to the city. Users can also compare their current search with previous searches.

- Tools Used: HTML5, CSS3, Javascript, jQuery, Firebase, Bootstrap
