PROFESSIONAL SUMMARY

A web designer/developer with a strong affinity for design. Spent over 10 years in the film and television industry and have strong storytelling abilities and excel in making things as user friendly as possible. Experience with HTML5, CSS3, Javascript, jQuery, AJAX, Firebase, Node.js, Express.js, Handlebars, Sequelize, mySQL, MongoDB, Mongoose, and React. Strong ability to collaborate and problem solve served me well in the film industry and is also very relevant in web design and development.

TECHNICAL SKILLS

Languages/Tools: HTML5, CSS3, Javascript, jQuery, AJAX, Firebase, Node.js, Express.js, Handlebars, Sequelize, mySQL, Mongo, Mongoose, and React

Design Software: Adobe Photoshop, Adobe Illustrator, Adobe inDesign, Adobe Premiere, Adobe After Effects.

PROJECTS

Project Title — *Chatbot Concierge*   *August 2019*

Many budget and chain hotels operate without a concierge but hotel patrons still want to know about activities that they can do in the local area. Many activities that give a town or city character are free but there is no good resource to find these activities. We built a website to show local activities tailored to the guest with 5 questions. Our stretch goal is to use this to create an Alexa skill to work with our app/site.

- Tools Used: React, CSS3, Javascript, MongoDB, Mongoose,, Node.js, Express,js, Passport.js
- https://chatbot-concierge.herokuapp.com/
- https://github.com/smprov22/Chatbot-Concierge

Project Title — *Rapid Logger*   *July 2019*

The Rapid Logger is designed to be a personal task management system that helps capture and organize tasks/events/thoughts quickly and easily. The brain often doesn't work in an orderly fashion so organizing a task manager that way doesn't always work. The rapid logger allows the user to quickly type in their events/tasks/notes using designated hotkeys and then they are automatically sorted in the task manager.

- Tools Used: HTML5, CSS3, Materialize, Javascript, jQuery, MySQL, Node.js, Express,js, Handlebars, Passport.js, Sequelize
- https://rapid-logger.herokuapp.com/
- https://github.com/smprov22/Rapid-Logger

Project Title — *TRVL*   May 2019

A one-stop-shop travel website where users can search a variety of destinations with high quality photos, weather information, and a map with information specific to the city. Users can also compare their current search with previous searches.

- Tools Used: HTML5, CSS3, Javascript, jQuery, Firebase, Bootstrap
